StrategyLab: Eisenhower Matrix

	Urgent	**Not Urgent**
Important	Do – (Your MVP)	Schedule – (For V2.0+)
	- Retrieve historical stock prices for one selected stock.	- Add more trading strategies, such as RSI and MACD.
	- Calculate moving averages and generate buy/sell signals.	- Support multiple stocks and portfolio comparisons.
	- Build a backtesting engine to simulate trades.	- Allow users to customize strategy parameters.
	- Compare the strategy against buy-and-hold.	- Add downloadable backtesting reports.
	- Display performance charts and key metrics, including total return, volatility, and maximum drawdown.	- Include additional performance metrics.
Not Important	Delegate – (Use a library)	Delete – (Cut it)
	- Use `yfinance` to retrieve historical stock data.	- Add real-money trading and brokerage integration.

- Use pandas and NumPy for data processing and calculations.

- Use Plotly to create interactive charts.

- Use Streamlit to build the web dashboard.

- Use Python testing tools to check calculations.

- Build user accounts and login functionality.

- Create a custom database for users and trades.

- Add AI-generated stock price predictions.

- Build a separate mobile application.
